Excludes Exam

eLearning Course Overview

About The Course

Information security is the protection of information from a wide range of threats in order to ensure business continuity, minimize business risk, and maximize return on investments and business opportunities.

When you purchase this product directly from the ACGC website you will receive the following:

– Lifetime access to the EXIN ISO 27001 elearning course

In the Information Security modules the following definition is used: Information Security deals with the definition, implementation, maintenance, compliance and evaluation of a coherent set of controls (measures) which safeguard the availability, integrity and confidentiality of the (manual and automated) information supply.

In the modules of Information Security Foundation based on ISO/IEC 27001, the basic concepts of information security and their relationships are tested. One of the objectives of this module is to raise the awareness that information is valuable and vulnerable, and to learn which measures are necessary to protect information.

Course Requirements

- There are no mandatory prerequisites.
- No specific prior knowledge required
- Familiarity with ISO standards and other service management frameworks (e.g. ITIL) is helpful

Target Audience

The ISO27001 Foundation Certification Course is designed for anyone working in IT looking for IT Service Management education and an understanding of how to provide business value.

The examination for the Information Security Foundation based on ISO/IEC 27001 is intended for everyone in the organization who is processing information. The module is also suitable for entrepreneurs of small independent businesses for whom some basic knowledge of information security is necessary.

This module can be a good start for new information security professionals.
